CSP ⁂ HOSTED EXCHANGE

Overview

E⊠ Exchange

Hosted Exchange, the popular Microsoft® email and productivity solution, is now available in a new reliable, resilient and feature-packed version. In addition to email, calendar and document sharing, Hosted Exchange 2013 brings you a streamlined Outlook Web App interface with enhanced touch for mobile users, the possibility to gather all contacts from various locations (Facebook, LinkedIn, address books, etc.) in one place, and a convenient tool that memorizes your behavior for easier, faster searches.

What is Hosted Exchange?

Exchange is a high-end **business email and collaboration solution** that we host on a top-of-the-line infrastructure maintained by Microsoft-certified engineers. We provide the latest Outlook applications that allow rich email creation, management and archiving, as well as calendar, tasks, contacts. With the addition of ActiveSync **mobile synchronization**, you can access your emails in real-time on your smartphone through PUSH technology. Hosted Exchange is quick and easy to deploy, and you can add or remove users at will on our user-friendly control panel.

Mobility

- Stay Connected to your inbox thanks to real-time synchronization on your iPhone/iPad, Android or Smartphone

- Get more done when you're on the move!

Flexibility

- Securely access your inbox through the full-featured and familiar Outlook Web App (OWA) from virtually any platform, web browser, or mobile device. Get more done when you're on the move!

The Hosted Model

As technology grows more sophisticated and IT departments are asked to do more with fewer resources, the hosted software model is becoming a preferred deployment option for many businesses. This approach proves to be more cost-effective than traditional alternatives as it requires no hardware investment and no additional IT resources. Over are the days of complex deployments and high upfront and maintenance costs: hosted software are quick to deploy and come at a fixed price per user per month. Additionally, your business-critical applications are no longer subject to in-house network stability and security concerns. CSP uses an entirely clustered and redundant architecture held in fully certified data centers.

Efficiency

- Share calendars or distribution lists with clients, just as if they were part of
